Intermediate
70
- Jayasri high school** 2018-2019
X
95

Skills

- C language
- Communication
- Java
- Html
- C++
- Data structures
- SQL

Projects

- Social media driven big data analysis for disaster management**
social media has emerged as a primary means for informing the ground realities and expressing the needs by people caught in the disasters. Since much of the social media access in disasters occurs from smart phones, it is possible, in theory, to find the spatial location of the data origin, but in reality, location information is rather spotty due to privacy concerns. Twitter has established itself as the disaster communication vehicle of choice due to its modest networking requirements, ease of use, and brevity.

Result:
the data relevant for situational assessment is generated from many different sources including social media use by the affected people (usually Twitter).

Interests

- Singing
- Reading comics
- Listening to music

Languages

- English
- Hindi
- Telugu

- Marathi
- Punjabi

A handwritten signature in black ink, appearing to read 'Dhanvitha' with a stylized flourish at the end.
